

JOB TITLE: ARCHITECTURAL DESIGNER I-II

FULL TIME NASHVILLE POSITION AVAILABLE

Firm: Comma Designworks is a small collective interested in all facets of design and development. We are a full-service, Nashville, TN based architectural design firm established in 2020 with a simple goal: take a fresh look at the services architects provide through the lens of modern technology, construction techniques, and processes, and recalibrate an architectural practice to the modern world. Comma has experience in a variety of project types, including but not limited to: Mixed-Use Multifamily, Hospitality, Office (shell/build-out), and Retail. We work through the entire design process, from design conception to project completion. We are a small firm geared for expansion, looking for the right candidate to add to our studio.

Position: Due to the scale of the office, the newest team member can expect a great potential for growth relative to industry standards. With that opportunity comes a greater amount of responsibility than a typical Architectural Designer position. The ideal candidate should be a highly motivated self-starter, problem solver, and interested in taking on substantial responsibility quickly. You will be working on project documentation ranging from conceptual design to construction documents, in-the-field construction oversight (Construction Administration), and generating detailed drawings using Revit and other design software for planning, design, and construction of projects. You will work both individually and as part of a team to assist in the coordination and preparation of construction documents and details.

Activities: Our team members perform work in a small studio environment and will be immediately included in collaborative, design-focused meetings, both internal and with the consultant/owner team. You may coordinate with team members in other disciplines to work on various projects for clients. In this position, you report directly to the Project Designer. The candidate should be motivated to take on new and challenging tasks. This role requires developed Revit skills. The candidate must have a desire to attend trainings and professional meetings to keep informed on new design criteria and policies. The position may require occasional travel to project site locations or to various client offices. On-site work may include walking the project to verify construction progress, taking construction progress photos, and completing field reports.

Required:

- Bachelor of Architecture or Masters of Architecture,
- Strong problem-solving, leadership, and motivation,
- Proficiency in Autodesk Revit with the expectation of continued software training,
- Excellent written and verbal communication skills, presentation experience,
- Ability to multi-task while meeting specified timelines,
- Availability to work overtime and weekends if necessary,

Preferred:

- Experience in an Architectural office environment,
- Proficiency in Lumion,
- Proficiency in Adobe Creative Suite,
- Experience in other modeling software such as Rhino, Grasshopper, Dynamo,

This is a full-time position with benefits package and competitive wages. Comma Designworks is an Equal Opportunity Employer.

If interested in the position, please provide portfolio, cover letter, and resume with references to: work@commadesignworks.com
